

Thank you

Thank you for being part of a heroic community that believes safe indoor air is a basic human right.

Every post shared, every legislator contacted, and every dollar donated brings us one step closer to safe indoor air.

We are so grateful to have you in our donor family. Your generosity fuels our mission and makes this critical work possible!

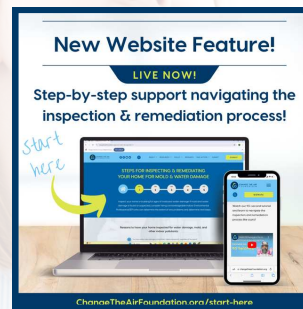

With gratitude,

Kendra Seymour

4 STEP-BY-STEP SUPPORT

Your support has helped thousands of people navigate the inspection and remediation process safely. This new, one-of-a-kind interactive feature covers in detail the **5 steps of the inspection and remediation process** in layman's terms.

Click here to explore this feature!

5 POLICY BRIEF

Finally, your generosity allowed us to publish our first **national report**, which shares the most updated and comprehensive analysis on the health and economic impacts of mold and water damage exposure in homes across the USA. It includes actionable steps that health professionals, researchers, and legislators can take today to address this crisis. Visit our website to learn more!

1 12 FREE DOWNLOADS

This spring, we released 12 free, actionable, and research-based downloads. From detailed guides and checklists to tips for hiring the right IEP and remediation company, your support empowers homeowners and renters across the country with the knowledge and tools they need to tackle indoor air quality challenges safely and effectively. Thanks to you, these popular guides have already been downloaded nearly **15,000** times!

Click here to grab your copies!

2 100 SCHOLARSHIPS

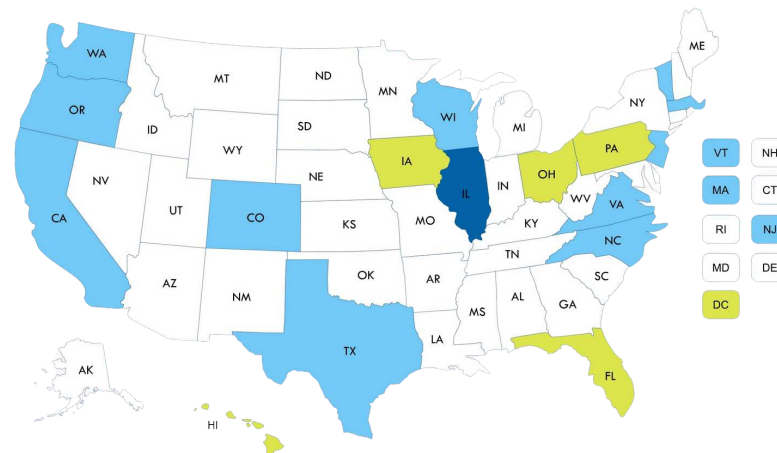

Because of you, we awarded our **100th scholarship** to individuals and families in need!

3 OUR 1ST BILL PASSED INTO LAW!

Thanks to our amazing volunteers, we successfully led **Illinois SB 1087, The Mold Remediation Registration Act**, into law! With this victory, Illinois becomes only the seventh state to require mold remediators to be licensed or certified. That means in **43** states, the person remediating your home is not required to have any kind of special training or knowledge on how to effectively and safely remove mold and water damage. As a result, ineffective, insufficient, and even unsafe remediation practices are happening every day across the country. We know our work is just beginning, but with the help of our amazing donors, supporters, and volunteers, we aren't slowing down!

Our Work In Action
